

Bluebeam Integrations

By Storm Consulting

Bluebeam integration in four easy steps.

- 1 Login to Bluebeam.
- 2 Select the Project and PDF to Download.
- 3 Download the PDF from Bluebeam (and upload to PIDtoExcel).
- 4 Upload the annotated P&ID as a revision to Bluebeam.

The screenshot shows the PIDtoExcel web interface. At the top, there is a user profile icon and the text 'pidtoexcel', along with a red 'Logout' button. Below this is a light blue notification box stating: 'This integration works with Bluebeam Studio Projects (United States region). Download/Upload are enabled only for PDFs that have been checked out (locked) by you and not in session.' Underneath, there are two main sections: 'Select project' with a dropdown menu showing 'PROJ-1284', and 'Select PDF from project' with a 'Choose a file' button and a dropdown arrow. At the bottom, there are two buttons: 'Download' with a download icon and 'Upload Revision' with an upload icon.

PIDtoExcel integration for Bluebeam, developed by Storm Consulting

Custom Bluebeam API & Automation Workflows for Engineering Tools

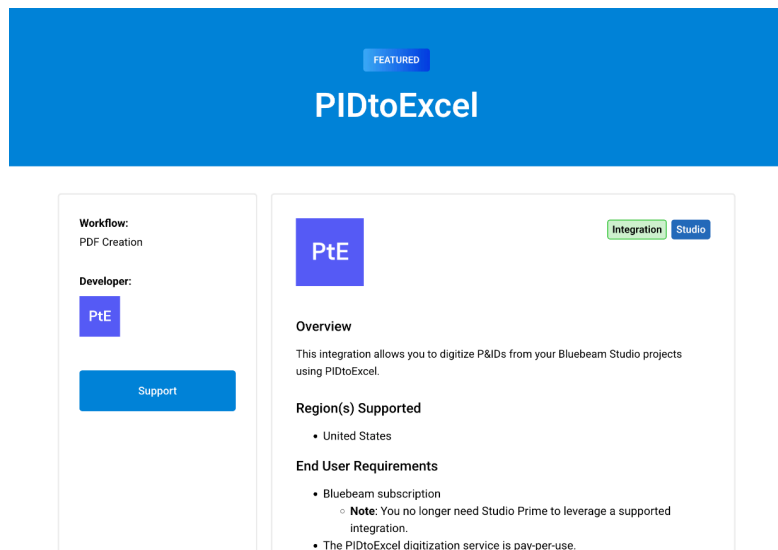

We help software teams, engineering vendors, and automation platforms build secure, production-ready integrations with Bluebeam Revu, Studio, and Bluebeam Cloud.

“

The Bluebeam integration created by Storm Consulting was all around great. Very fast turn-around time.

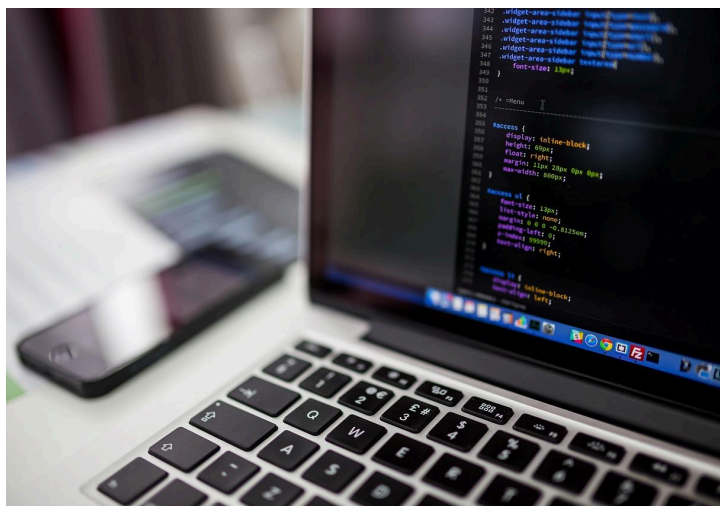

-PIDtoExcel

”

What We Offer

- 1. Job-Based API Integrations:** Pull markup data, PDFs, and metadata for use in your app workflows.
- 2. Studio Session Support:** Build tools that respect Studio file trees, permissions, and live markup behavior.
- 3. Custom Markup Extraction:** Convert Bluebeam annotations into structured data (e.g., Excel, JSON, CSV).
- 4. Enriched PDF Overlays:** Return data-embedded PDFs with annotation metadata and revision comparisons.

Who We Work With

1. SaaS vendors in digital twin, Bluebeam PDF document intelligence, or EPC tooling
2. Engineering automation startups with PDF workflows
3. System integrators building markup or handover pipelines
4. Product teams looking to expose engineering intelligence via Bluebeam

Why Storm Consulting?

1. Created integrations listed on the Bluebeam Integrations Directory
2. Specialized in engineering-first PDF workflows (P&ID; markup automation, datasheet overlays)
3. Experienced with Bluebeam's job-based API, markup parsing, and revision-aware workflows

Let's Talk Integration

We're ready to help you build powerful, stable Bluebeam integrations.
